## I. Market Commentary

## Market Commentary - Quarter Ended October 31, 2019

## SUMMARY

- Over the quarter, U.S. economic conditions were characterized by: (1) slowing projected growth; (2) a low unemployment rate with moderating wage gains; (3) two Fed rate cuts; (4) growing risks to the economic outlook, including escalating trade conflicts, further weakening in manufacturing, and deteriorating business confidence and investment; (5) worsening conditions abroad, including a messy Brexit and geopolitical conflicts with Iran/Saudi Arabia, Syria/Turkey and Ukraine/Russia, and; (6) U.S. presidential impeachment proceedings that created a new political wildcard.
- While a recession in the U.S. does not appear imminent, forecasts for economic growth continue to be pared. The global growth forecast for 2019 from the Organization for Economic Co-operation and Development was revised down from $3.2 \%$ to $2.9 \%$, which would mark the slowest pace in over 10 years.
- Committee cut the overnight fed funds target rate twice during the quarter -September and again in October - to the new range of $1.50 \%$ to $1.75 \%$. Both cuts were welltelegraphed and with the September cut characterized as a "mid-cycle policy adjustment and the October cut characterized as "insurance against ongoing risks". No future cuts are expected in the foreseeable future.

## ECONOMIC SNAPSHOT

- The advance release of second quarter U.S. gross domestic product (GDP) indicated the U.S. economy grew at $2.1 \%$, trailing the $3.1 \%$ growth from the prior quarter, but outpacing consensus expectations of $1.8 \%$. Growth was propelled by a jump in personal consumption to $4.3 \%$, an increase from the prior quarter of $1.1 \%$ and the largest quarterly consumption figure since December 2017.
- The U.S. labor market remained positive, although it may be showing signs of losing momentum. For example, average monthly job growth was 163,000 well short of the 223,000 average of monthly gains in 2018. Nevertheless, the unemployment rate ticked lower to 3.6\% near historic lows.
- Inflation remains tame, as the Fed's preferred inflation gauge, the core Personal Consumption Expenditure price index, rose to $1.8 \%$, just a bit below the Fed's 2\% target.
- In the beginning of the quarter ISM Manufacturing PMI survey fell to 47.8, the lowest level since 2009, but it showed slight improvement in October. Trade uncertainty has caused business to pull back plans for hiring and expansion. If a trade deal emerges, it could set the stage for a recovery in the sector.

## INTEREST RATES

- U.S. Treasury yields across the curve continued their descent, falling for the fourth consecutive quarter. The yields on the majority of U.S. Treasury maturities ended the quarter near two-year lows. At quarter-end, the yield on a 3-month Treasury bill was $1.62 \%$, the 2 -year note was $1.54 \%$, the 10 -year note was $1.69 \%$
- The yield curve neared the greatest level of inversion over the past 15 years in late August, as the spread between the 3 -month and 10-year Treasuries reached 50 basis points $(-0.50 \%)$, although it finished the quarter with no inversion. In response to back-to-back rate cuts at the September and October FOMC meetings, short-term yields fell, which pushed the yield curve out of inversion.

## SECTOR PERFORMANCE

- Absolute fixed income returns were strong across the board. Diversification was a mixed bag for performance. Credit sectors boosted portfolio returns as credit markets shrugged off weaker growth prospects, resulting in tighter spreads. On the flip side, municipal debt generally underperformed as lower yields inspired a flurry of new issuance and refinancing activity that caused spreads to widen in the sector.
- Federal agency and supranational allocations generated slightly positive excess returns for the quarter even though spreads remained near all-time tights across the curve. Continuing the trend over the past several quarters, callable securities underperformed as declining yields drove increased redemption activity.
- The investment-grade corporate sector continued to be one of the best performing fixed income sectors for the quarter and YTD. Positive earnings, stable fundamentals, and easier monetary policy outweighed trade tensions and geopolitical risks during the quarter. Despite one of the highest issuance months on record in September, investor demand remained strong, absorbing the new deals and resulting in spreads grinding back near YTD lows. A flat credit curve and tighter credit spreads have reduced the attractiveness of the corporate sector
- Mortgage-Backed Securities (MBS) generated modest positive excess returns, although relative performance belied the volatility during the quarter and was dependent on collateral term and coupon structure. The decline in longer-term Treasury yields - which translates to increased refinancings and shorter MBS durations - weighed on the sector. Higher coupon 30 -year MBS were great performers, but 15-year collateral pools posted negative excess returns. Agency commercial mortgage-backed securities have been a top-of-class performer for much of 2019, as these structures are generally less sensitive to interest rate volatility and ultimately, prepayment risks.

Notes:

1. Bank of America/Merrill Lynch (BAML) indices provided by Bloomberg Financial Markets. The total returns shown for periods longer than a year are the annualized returns for the stated period.
2. The portfolios in red have temporarily suspended their investment strategies due to 2019 bond funding.
3. Since inception performance for all portfolios other than 'BPCA Other Post Employment Benefits' and 'BPCPC Other Post Employment Benefits' is calculated from January 31, 2006 to present
4. For the 'Reserve Fund,' the inception of the BAML 1-5 Year Treasury Index as the performance benchmark is July 31, 2013. For prior periods, the BAML 1-10 Year Treasury Index was utilized.
5. Since inception performance for the 'BPCA Other Post Employment Benefits' is calculated from January 31, 2008 to present.
6. Since inception performance for the 'BPCPC Other Post Employment Benefits' is calculated from February 12, 2010 to present.

## Performance Summary - Total Return Strategies

- U.S. Treasury yield curve "un-inverted" at the end of the quarter as short rates fell significantly while the decline in intermediate and longer-term yields were muted in comparison. The curve is essentially flat from 1 month to 5 years.
- The Federal Reserve made a 3rd consecutive $1 / 4$ percent rate cut at its October 30 FOMC meeting. It characterized the latest move as "insurance against ongoing risks" and now views policy as "in a good place." The new target range is set at $1.50 \%$ to $1.75 \%$ and likely to remain there for the foreseeable future.

## Longer-Term Funds

- The following portfolios temporarily suspended their investment strategy to accommodate the liquidation strategy (\$44 million liquidated to fund payout of reduction in debt service reserve) for the 2019 bond financing: 2003 Reserve Fund, Operating Reserve Contingency Funds, Insurance Fund, and the Operating Budget Reserve.
- The two OPEB portfolios generally performed in line with their benchmark for the quarter ending October 31, 2019.

## Short-Term Funds

- The two short-term portfolios performed generally in line the BAML 3 Month Treasury Bill index for the quarter and outperformed for the 12 months ending October 31, 2019.
- Each portfolio is positioned to match the unique requirements of expected cash flows. Consistent with historical patterns, the 2003 Pledged Revenue account experienced significant cash inflows during the quarter. The cash contributions were reinvested in short-term securities to align with future expected withdrawals.
- Highly-rated commercial paper value has diminished as the spread between Treasuries and commercial paper has narrowed. We continue to utilize commercial paper in short-term portfolios where appropriate and as value presents itself.

## Notes:

1. End of quarter trade-date market values of portfolio holdings, including accrued interest.
2. Pursuant to the Authority's Investment Policy, investments in obligations other than those backed by the full faith and credit of the U.S. Government are limited to the following: (1) Federal Agencies - $\$ 250$ million per issuer, (2) Commercial Paper - the lesser of $5 \%$ or $\$ 250$ million per issuer, (3) Bankers' Acceptances - the lesser of $5 \%$ or $\$ 250$ million per issuer and (4) Municipal Bonds - $10 \%$.

## IV. Total Return Performance Attributes

## Total Return Portfolio Attributes

# Portfolios Managed with a <br> Longer-Term Investment Strategy 

## Longer-Term Investment Strateqy

Notes:

Notes: Performance on trade-date basis, gross-of-fees in accordance with the CFA Institute's Global Investment Performance Standards.
1.
2. 2003 Reserve Fund, Operating Budget Reserve, Insurance Fund, and the Operating Reserve Contingency Funds have temporarily suspended their investment strategies due to 2019 bond funding
3. Bank of America/Merrill Lynch (BAML) indices provided by Bloomberg Financial Markets. The total returns shown for periods longer than a year are the annualized returns for the stated period.
4. Duration is the change in the value of a security that will result from a $1 \%$ change in interest rates, stated in years.

 performance for the 'BPCPC Other Post Employment Benefits' is calculated from February 12, 2010 to present.

## 2003 Reserve Fund Portfolio
