Sunday, February 3, 2019

**4:10pm - 5:00pm Resiliency and Environmental Protections
Panel**

Introduction by Catherine McVay Hughes

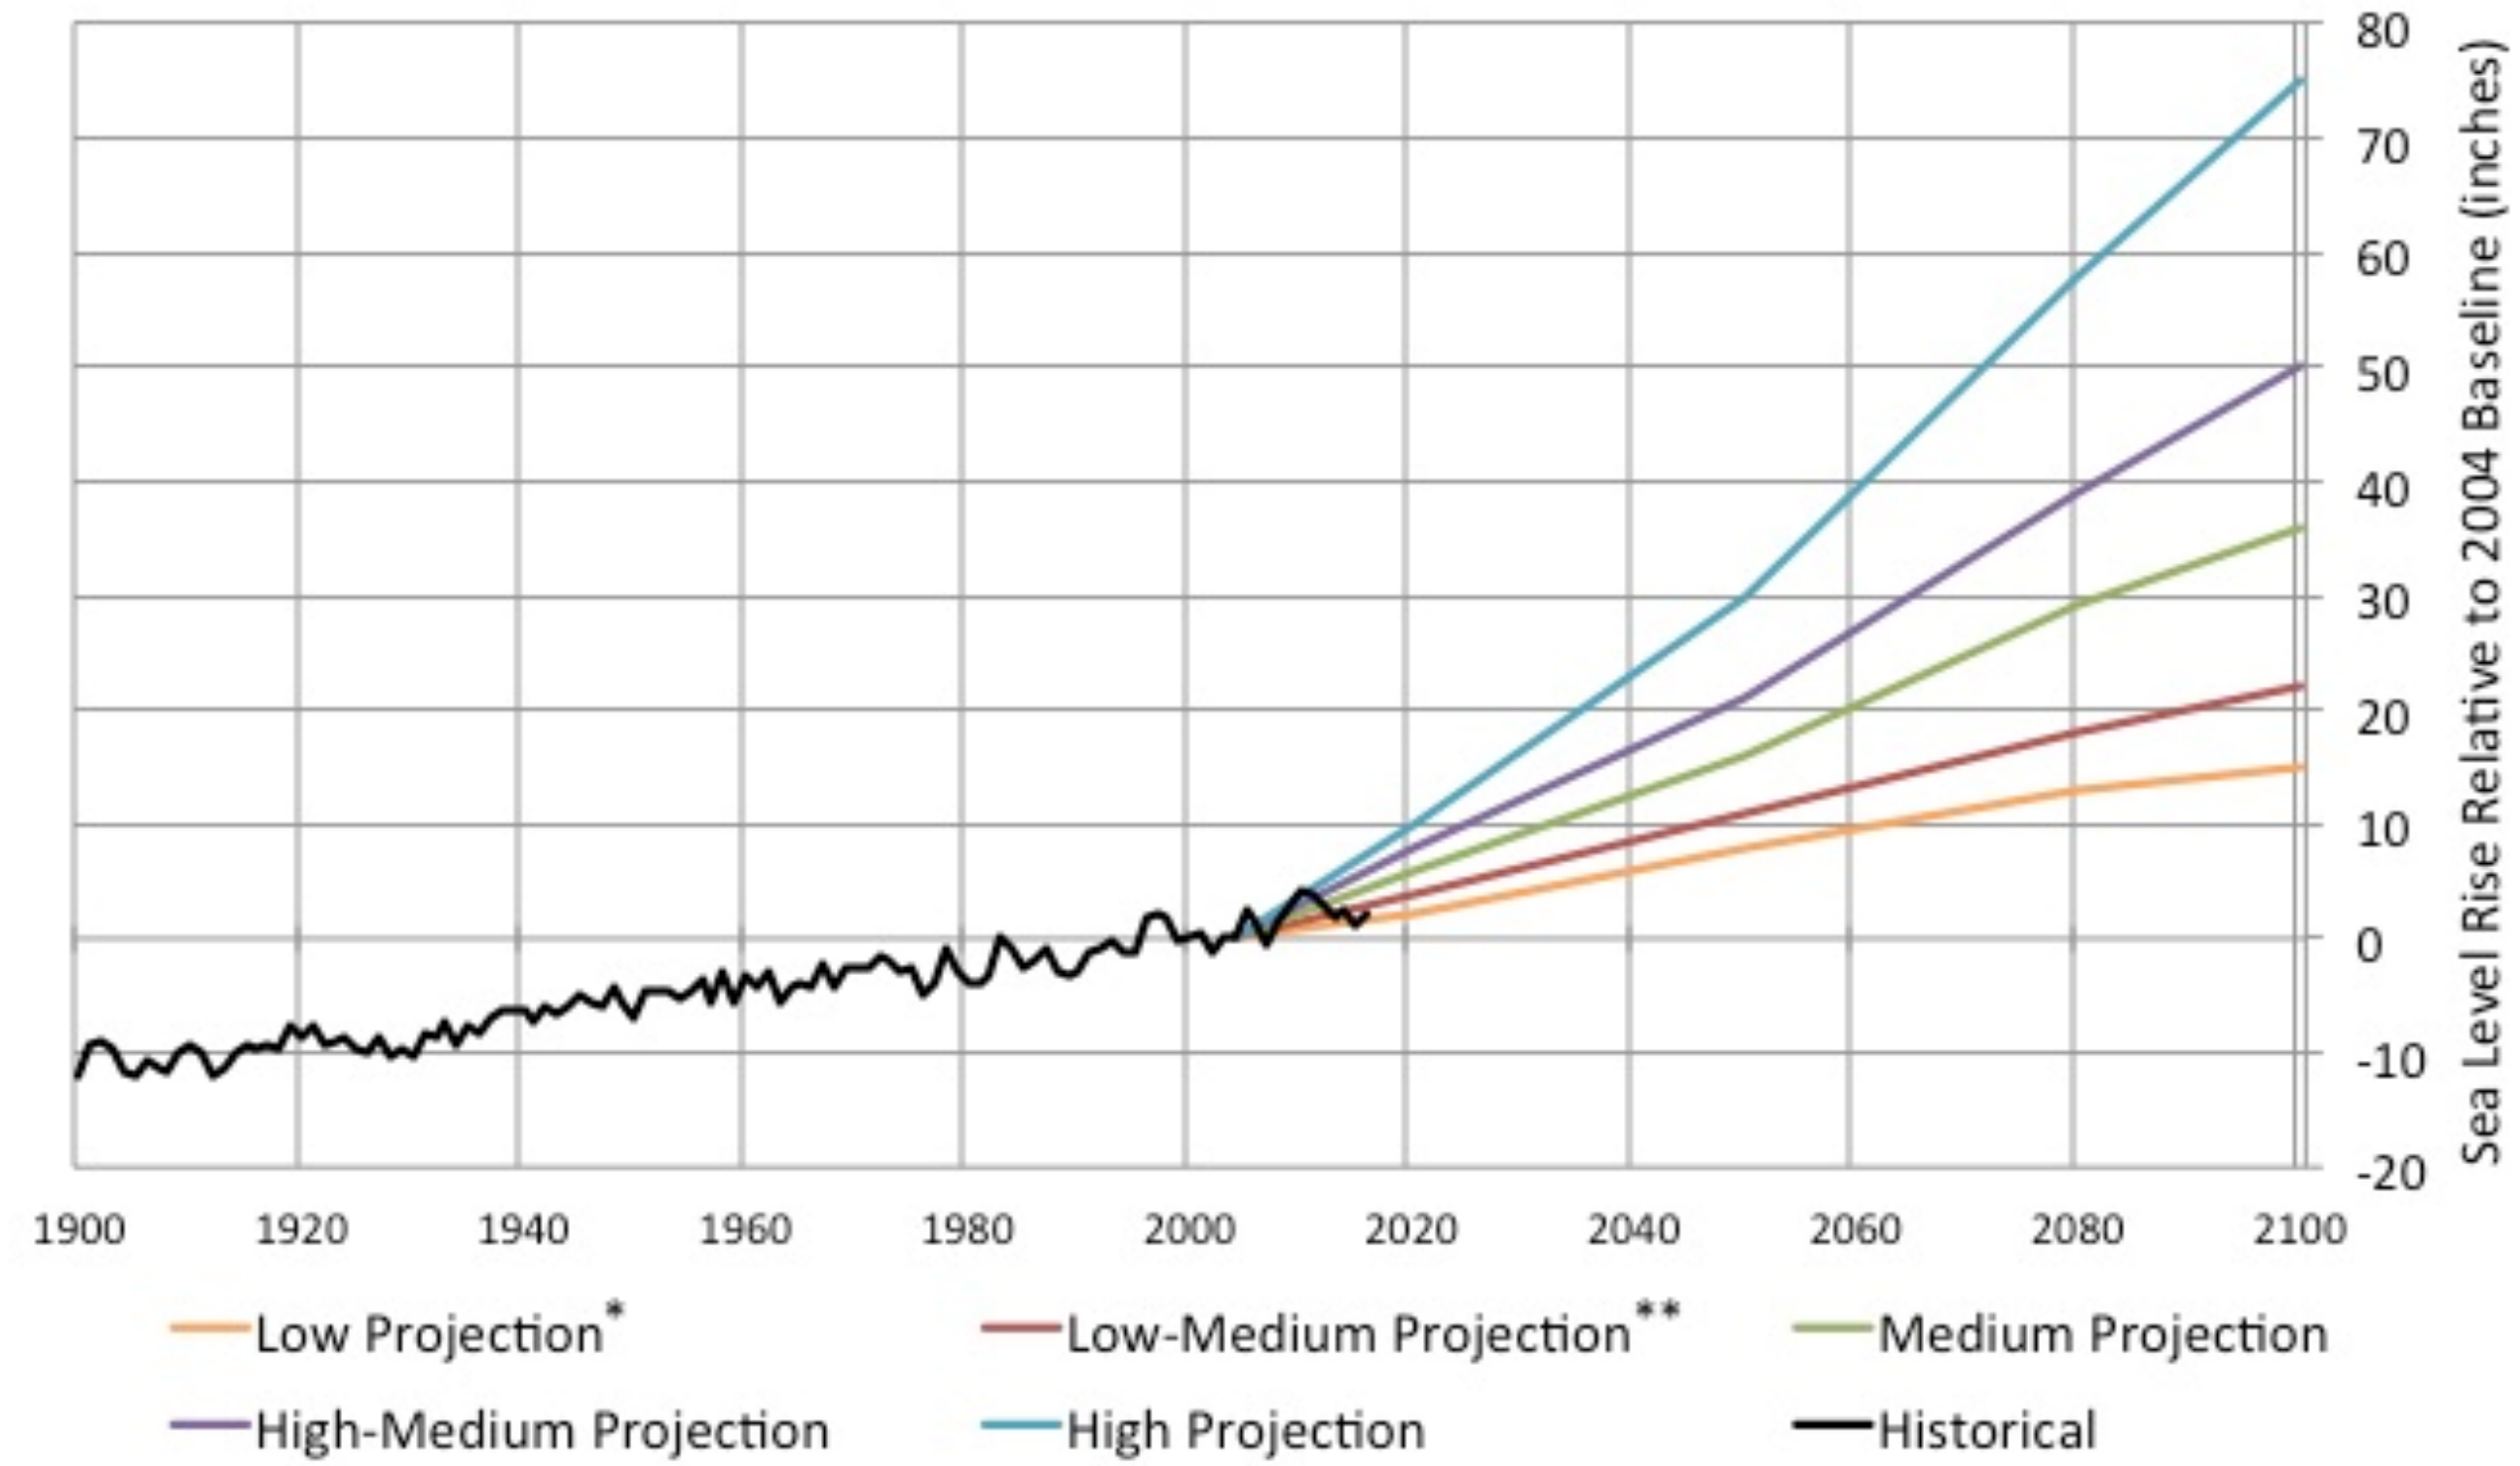

Manny Cantor Center, 197 East Broadway, New York, NY

Citywide Greenhouse Gas Emissions Are Going Sideways not Down

Source: [1.5°C: Aligning New York City with the Paris Climate Agreement](#), OneNYC, September 2017, p. 43; “To prevent the worst impacts of climate change, cities across the planet must dramatically reduce their GHG emissions to limit the increase in the global average temperature to well below 2 degrees Celsius above preindustrial levels, and reach even further to support the collective effort to limit temperature rise to less than 1.5 degrees Celsius.” p. 5

Official Sea Level Rise Projections for New York City

Graphics by Christian Termyn

* Historical sea level rise sourced from Permanent Service for Mean Sea Level data for New York (the Battery), available at: <http://www.psmsl.org/data/obtaining/stations/12.php>

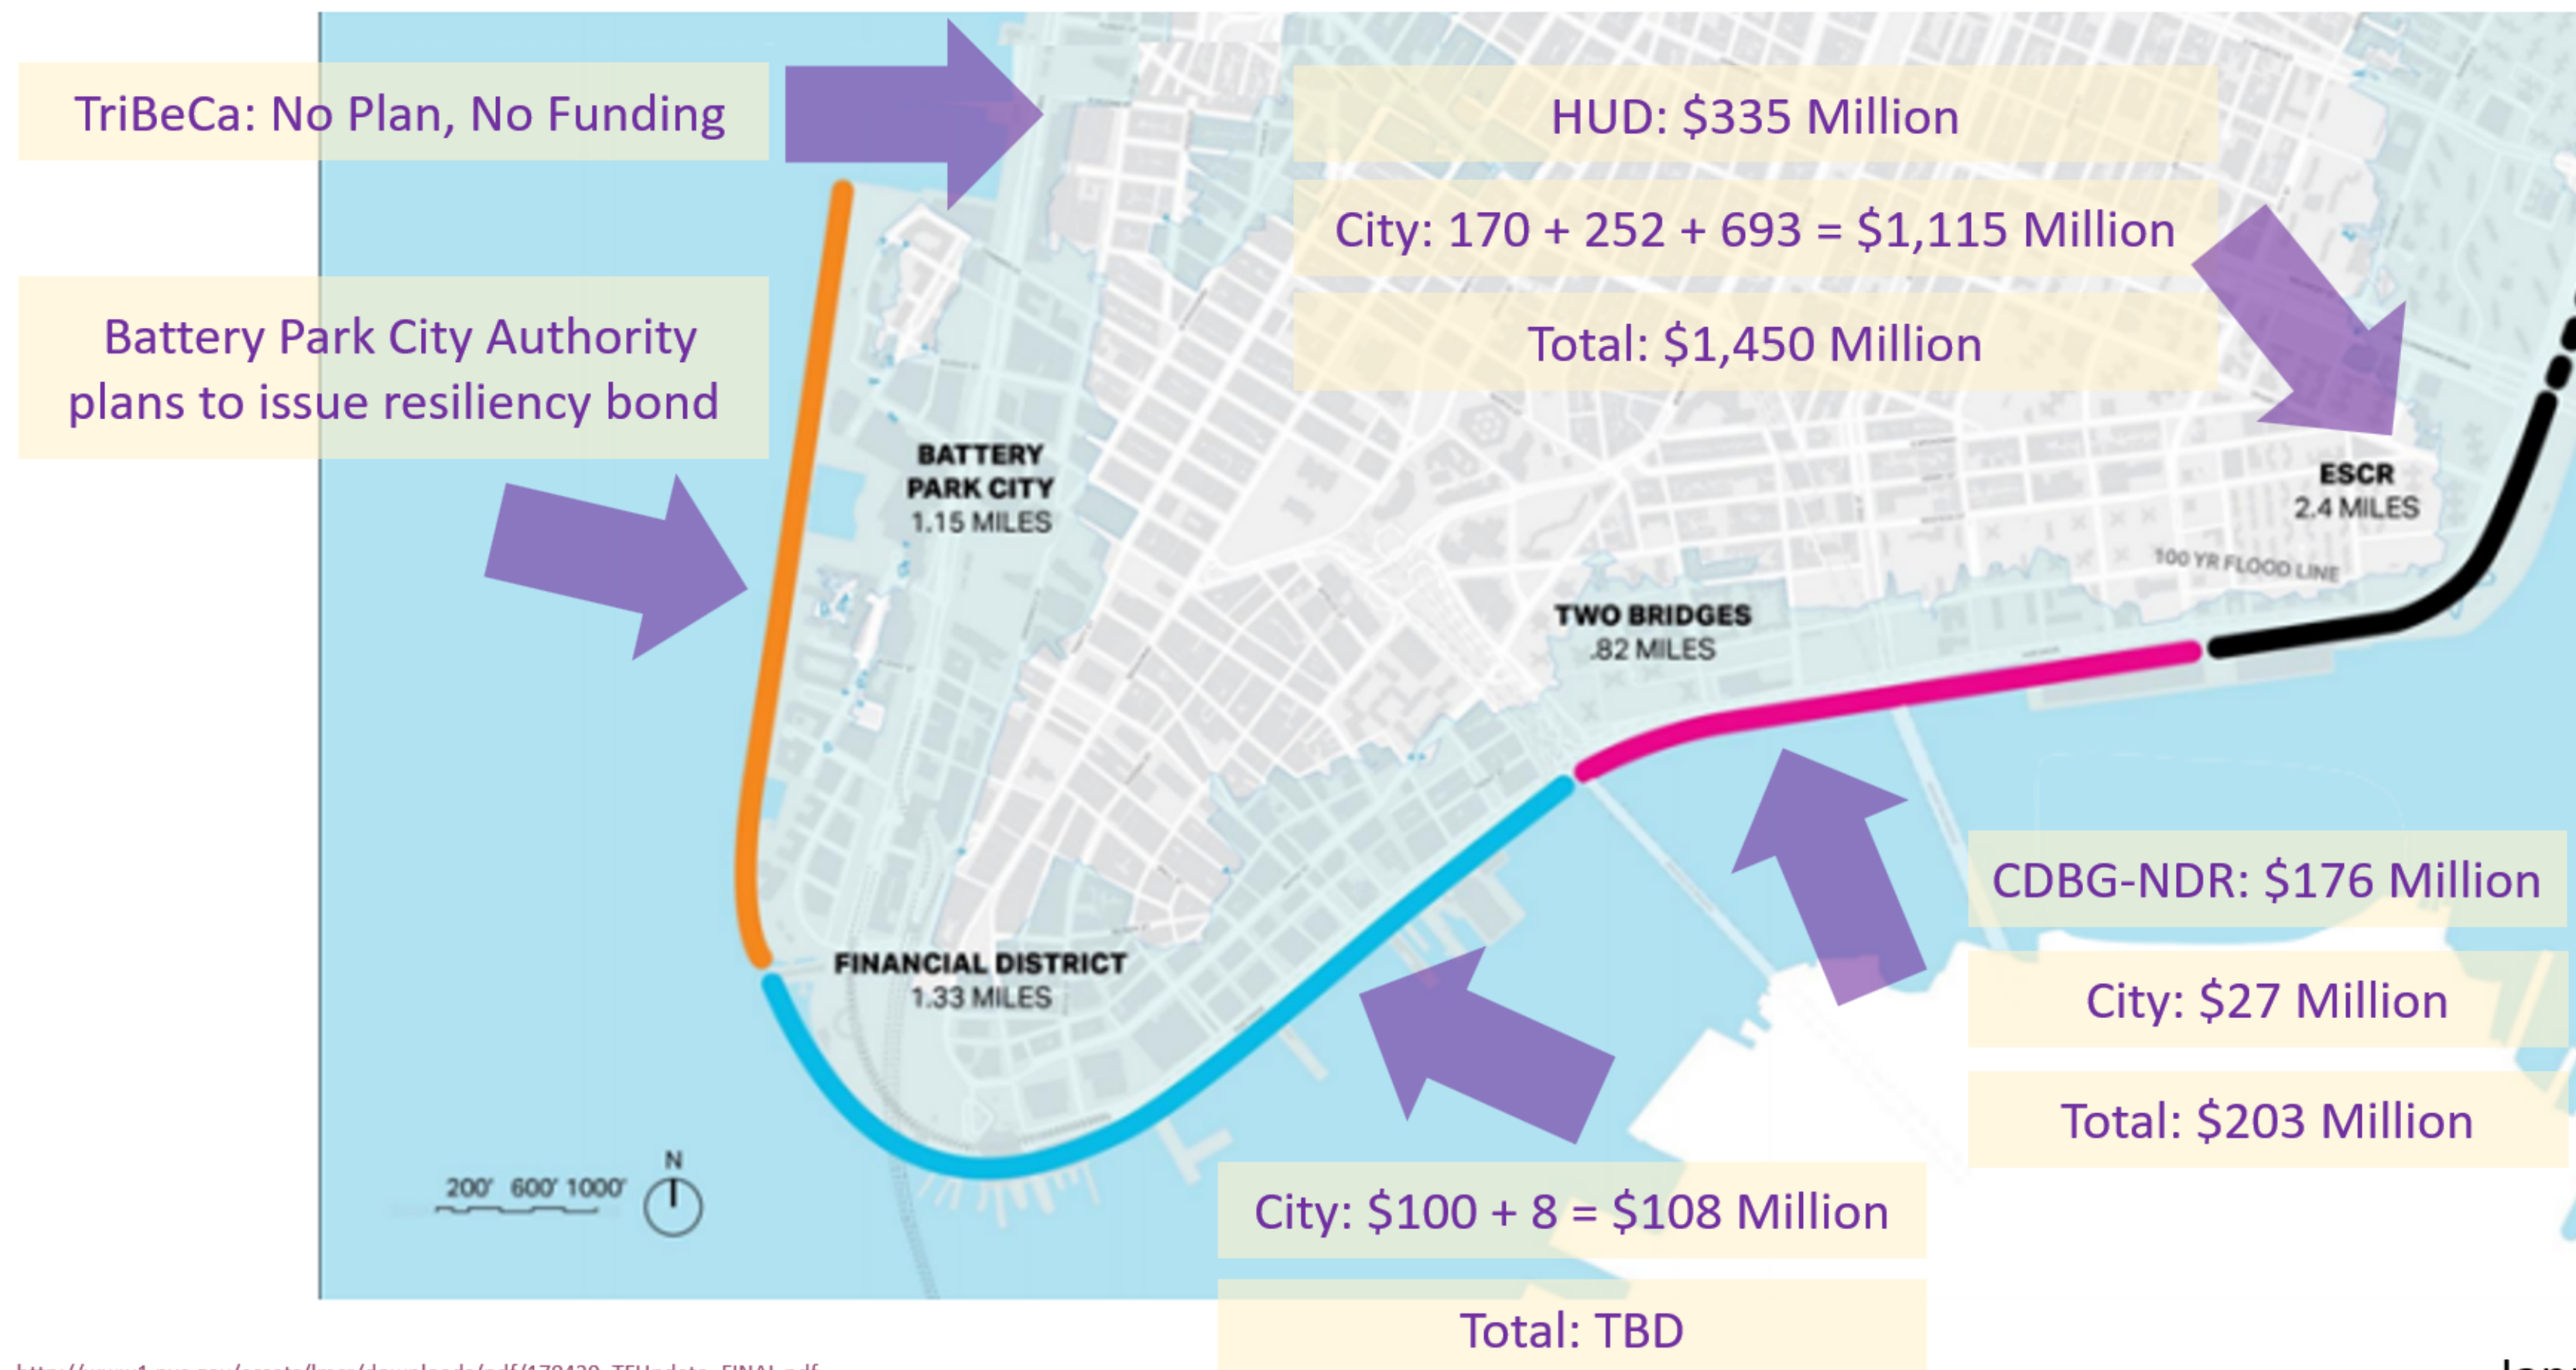

** NYS Sea Level Rise Projections, 6 NYCRR Part 490. Projections represent inches of rise over baseline level, which is defined as the average level of the surface of marine or tidal water over the years 2000 through 2004.

Sea level rise by 2100 assuming **1.5 degrees C Warming (2.7 degrees F)** as estimated by Climate Central, Surging Seas Mapping Choices

Sea level rise by 2100 assuming **4.0 degrees C Warming (7.2 degrees F)** as estimated by Climate Central, Surging Seas Mapping Choices

3: Southern End

4: Western Perimeter

BATTERY PARK CITY RESILIENCY PROJECTS

In 2012 Hurricane Sandy made landfall, leading to more than 100 fatalities and \$70 billion in damages across a dozen states. In New York City alone, the storm resulted in more than fifty lives lost, millions of traumatized residents and billions of dollars in property damage, along with extensive loss of income and productivity. While Battery Park City fared better than many other affected areas of New York City, it nevertheless sustained millions of dollars of damage to Pier A Harbor House on its southern end, as well as to the BPC Ball Fields and Asphalt Green Community Center in the north as storm surge waters poured in from West Street on BPC's eastern boundary.
